

Fong Lieu

Los Angeles, CA | (720) 921-4111 | fonglieu8@gmail.com

TECHNICAL SKILLS

Programming & Statistical Languages: SQL, Python, R

Libraries & Frameworks: pandas, NumPy, matplotlib, scikit-learn, dplyr, tidyr

Data Analysis & Visualization: Tableau, Power BI, Excel

Data Management: Data Extraction & Transformation, Databases, Salesforce

EDUCATION

Loyola Marymount University

May 2026

M.S., Business Analytics

Achievements: Graduate Student Association (VP), Beta Gamma Sigma Honor Society

Coursework: Machine Learning, Text-Mining, Marketing Analytics, CRM Analytics, Supply Chain Analytics, Data Visualization & GIS, Programming for Data Management

University of California, Los Angeles

December 2024

B.A., Economics | Minor: Data Science / Statistics

Coursework: Econometrics, Data Science, Computational Statistics, Finance/Investments, Accounting, Data Analysis & Regression

WORK EXPERIENCE

Pricing Analyst — Onboard Logistics

Sep 2025 – Present

- Performed data extraction and transformation on multimodal freight rates to design cost-efficient routing strategies, supporting initiatives projected to increase margins by 3%.
- Prepared 30+ weekly rate proposals, improving win rate by 2% and generating \$4,500+ monthly gross profit.
- Developed KPI dashboards in Tableau for a team of 5, summarizing agent close rates, expected GP, and incoterm trends across 32+ agents.

Professional Learning Facilitator — UCLA Economics Institute

Jun 2023 – Aug 2024

- Delivered 30+ daily lessons for 125 students, leveraging performance data and feedback loops to continuously improve learning outcomes.
- Created 200+ practice problems and proctored/graded 400 exams using AI tools to streamline scoring workflows and ensure timely reporting.
- Improved average exam scores by 4% through targeted Q&A sessions and data-driven identification of student performance gaps.

PROJECTS

Gender Pay Inequity Analysis — LMU Datathon

- Analyzed NLSY97 longitudinal dataset (8,900+ individuals, 20+ years of wage data) using Python (pandas, NumPy) and regression models to evaluate gender pay inequity, finding men earn ~13% higher wages.
- Built lagged wage and interaction models to identify drivers of pay persistence; found prior salary explains 35.8% of wage variation and disproportionately impacts women, informing policy implications around salary history bans.

Airline Sentiment Analysis — British Airways

- Assessed sentiment across 3,701 airline reviews in Python, using AI tools to structure text-processing prompts and automate preprocessing.
- Compared three NLP models on a 100-review validation set; selected DistilBERT as the best performer with 68% accuracy.
